## Turtle Restoration & Turtle Conservation Pond

The restoration and conservation of eight turtle species, crucial for maintaining aquatic ecosystems, are milestones in the college's commitment to biodiversity preservation. The campus pond becomes a sanctuary for these remarkable creatures, contributing to broader global conservation goals.

Eight species totaling 50 individuals, ranging from vulnerable to critically endangered (IUCN-2021), find a refuge in the campus pond. The conservation status of each species is as follows:

- *Pangshura tecta* (Indian Roofed Turtle): Vulnerable
- *Pangshura tentoria* (Indian Tent Turtle): Least Concern
- *Lissemys punctata* (Indian Flapshell Turtle): Vulnerable
- *Goeclemys hamiltonii* (Spotted Pond Turtle): Endangered
- *Nilssonina gangetica* (Indian Softshell Turtle): Endangered
- *Nilssonina hurum* (Peacock Softshell): Endangered
- *Nilssonina nigricans* (Black Softshell Turtle): Critically Endangered
- *Kachuga sylhetensis* (Assam Roofed Turtle): Critically Endangered

Pond is used for revenue generation by pisciculture practice.
